

# Tourism website

## Abstract:

As tourism is one of the fastest growing industries today, thus within the tourism industry events are getting more and more important. People have become more interested in events of all kinds, and will travel far away to participate in events that they find interesting.

Events can offer various economical and social benefits for destinations, and therefore destination managers can and should employ events effectively in a tourism role. It has become widely accepted that every community and destination needs to adopt a long-term, strategic approach to event tourism thereby planning and development in order to realise the full tourism potential of events.

By using the **Html,css,javascript** we can build this tourism website in this way

**Html:** It is used for structuring the web page by adding the tags like heading,division,marquee,section,forms etc

**CSS:**By using the css we can style web page by our own thinking

**Javascript:**It gives the rich interface & immediate feedback to the visitors for our website

## Modules

The different modules used in this website are:

1)**SearchBar:** In the search if we type our favourite place like ex:Charminar means it will shows the results for the selected place & it will give the complete information about the Charminar

2)**map:** This maps will help the user to reach their destination safely, and what are the ways to reach.

3)**Form:** If user want to give the any feedback means this form will improve the administrator

Like:

\*)To change the places of the users needs

\*)Giving the attractive destinations and updating time to time

## Advantages:

->user can search the their favourite places across the world by using this website

->As the income of government will also be increase by visiting number of tourist places

->If there there is no tourism then the per-capita income will decrease , as we saw recently in the srilanka
